

MOBILE APP/WIFI CONTROLLED LED DESTINATION SIGN QUICK SETUP

1. Connect power wires to the vehicle power source or cigarette lighter plug
2. After LED destination sign powers up, it will create WiFi network called "TF_WIFI-*****"
3. Connect to the WiFi network (use DHCP settings if you use computer to connect)
4. If the WiFi network asks for password, the network password is "888888"
5. Download PowerLed or/and PowerLed Pro apps to your mobile and install them.
6. You can also use PowerLed program for PC computers via WiFi.
7. Open PowerLed app and if the app doesn't automatically search for LED destination sign, push "search" to find it.
8. After LED destination sign is connected, follow the steps on the following video to alter the texts in the sign:
